ATS now providing Small Business Telephony VoIP phone systems, support, and installation

ATS is focusing on telephony systems that integrate with the customer's computer network to provide advanced features. This goal has led us to offer a D-Link/Microsoft solution as an entry point, and Cisco systems for the customer that wants it all.

The Cisco phone system offers an almost unlimited phone and configuration options. This quote offers a four line/5-user unit that meets the needs of most users. Complete multi line phones with color displays and touch screens are available.

This link provides other phone models available for the Cisco system:

http://www.cisco.com/en/US/products/sw/voicesw/products_category_buyers_guide.html

The Cisco Advantage

- includes world class Internet router and firewall
- Full DID Support
- optional remote office extensions via Internet
- has over 20 phone model options including color, touch screens and wireless
- takes better advantage of infrastructure technologies such as QoS and VLANs
- PoE - Power Over Ethernet. No power adapter needed on your phone!
