

MANAGED BACKUP SERVICES

ATS MANAGED BACKUP SERVICES

Managed Backup Services

While computer systems have made great advances in reliability, a good business plan includes the ability to recover from data loss, data corruption and full out disasters. As our business risk associated with data loss increases, so should our diligence in planning for the possibility.

The common backup issues we often struggle with:

- Who is going to watch the backup's log?
- Who wants to change tapes?
- Do I trust the off-site backup of our company data to sit on your secretary's kitchen counter every week?
- The hardware costs; backup devices are expensive, how do make sure my investment will meet my needs in twelve months?
- Are my backups being tested to insure that recovery will be possible when needed?

ATS has a Managed Backup solution that addresses these concerns. For a monthly fee, ATS provides the hardware, software, configuration, installation, daily monitoring, restoration services, tape rotation and secured storage, and routine restoration testing. ATS can provide a customized tailored solution to meet your specific needs.

Basic plan pricing is a follows:

300 GB Disk Storage	500 GB Disk Storage	1 TB Disk Storage
36 GB Tape Storage	200 GB Tape Storage	400 GB Tape Storage
\$299/month	\$399/month	\$550/month

Additional capacities available upon request

No setup fees! No minimum contract length!
